SUMMARY

Final-year Computer Science and Engineering undergraduate with hands-on experience in full-stack web development, AI and computer vision, and IoT embedded systems. Proficient in Python, Java, and JavaScript, with projects spanning real-time WebSocket applications, interactive 3D web interfaces, and microcontroller-based prototypes.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, JavaScript, C++ (Arduino), HTML, CSS, SQL
- **Web Development:** React, Node.js, Express.js, Socket.io, Three.js, React Three Fiber, GSAP, REST APIs, WebGL
- **AI and Computer Vision:** PyTorch, TensorFlow, OpenCV, NumPy, Pygame
- **Hardware and IoT:** ESP32 microcontrollers, MPU6050 sensors, L298N motor drivers, Arduino IDE, embedded C++
- **Tools and Concepts:** Git, GitHub, VS Code, Leaflet.js, HTML5 Geolocation API, MVC architecture, OOP, data structures and algorithms

EDUCATION

Bachelor of Technology in Computer Science and Engineering | 2023 - 2027 (4th year, 7th semester)

Rajarshi Rananjay Sinh Institute of Management and Technology (AKTU-affiliated), Lucknow, India

EXPERIENCE

Summer Technical Intern, IoT and Artificial Intelligence | Madan Mohan Malaviya University of Technology, Gorakhpur, India | Jun 2026 - Jul 2026

- Completed a 40-day intensive program on designing Internet of Things systems and artificial intelligence models.
- Built and tested sensor-driven embedded prototypes, applying microcontroller programming and machine learning to real-time hardware problems.

Research Associate Intern | BYAMN (Remote) | Mar 2026 - Jun 2026

- Conducted opportunity mapping, data gathering, and industry research to support strategic decision-making, delivering structured findings to stakeholders.
- Received a certificate of completion for exceeding assigned research objectives.

Campus Ambassador Intern | CampusCrew (Remote) | Dec 2025 - Feb 2026

- Led targeted campus outreach and promotional campaigns to grow student engagement, coordinating planning and execution with the remote team.

PROJECTS

Gesture-Controlled Mobile Rover | ESP32, MPU6050, Arduino C++ | Jun 2026 - Jul 2026

- Engineered and assembled a hardware prototype using ESP32 microcontrollers, MPU6050 inertial sensors, and L298N motor drivers.
- Programmed the control system in Arduino C++ to translate real-time gestures into accurate, low-latency motor commands.

AeroHealth Dashboard | Full-Stack Web Application | Oct 2025 - Nov 2025

- Developed a full-stack, AI-assisted web application for real-time environmental air quality monitoring.
- Integrated geospatial visualization APIs and automated health reporting derived from live AQI metrics.

Python Chess Engine | Python, Pygame

- Built a fully functional object-oriented chess engine from scratch in Python using Pygame, following an MVC architecture separating game logic from the GUI.
- Implemented ray-casting-style move generation to detect absolute pins, checks, and sliding-piece paths, including castling, en passant, and pawn promotion.

Real-Time Device Tracker | Node.js, Express, Socket.io, Leaflet.js

- Built a real-time location tracking app streaming live device coordinates over WebSockets via the HTML5 Geolocation API.
- Added multi-user support with automatic marker creation, updates, and cleanup on disconnect over OpenStreetMap tile layers.

Dogstudio 3D WebGL Clone | React, Three.js, React Three Fiber, GSAP

- Built an interactive 3D website clone with custom shader materials, binding camera movement and model animation to scroll progress via GSAP ScrollTrigger.

Smart Price Hunter | Web Application, Data Visualization

- Built an e-commerce price intelligence app comparing prices and deal scores across retailers, with filtering, sorting, and analytics charts.

CERTIFICATIONS

- **Certifications:** [Make Agentic AI Work for You \(Credly\)](#); [Agentic AI Skill Up \(GeeksforGeeks\)](#); [IBM SkillsBuild AICTE](#); [HCL GUVI](#)
- **Extracurricular:** [TATA Crucible Campus Quiz 2025](#) (Certificate of Participation)
- **Fitness:** Completed two certified virtual half marathons (21.51 KM and 21.22 KM), both new Personal Records.
